DOL/ETA/OWS
Revised 10/01/12

Based on actual data through 06/30/2012

* Projected rates are based on economic conditions specified by the USDOL.

** The Average High Cost Multiple (AHCM) is defined as the ratio of the 'Trust Fund as a Percent of Total Wages' (Reserve Ratio) to the Average High Cost Rate (AHCN).
The USDOL provided Average High Cost Rate is the average of the three highest benefit cost rates in the last twenty years (or a period including three recessions, if longer).
Benefit cost rates are benefits paid (including the state's share of extended benefits but excluding reimbursable benefits) as a percent of total wages in taxable employment.

*** A voluntary payment of \$221,504,720.98 was made in May 2012. Remaining loans are repaid via FUTA Credit Reductions and a voluntary payment with a return to solvency in the second quarter of 2015
